Module Index

1.1 Modules

Here is a list of all modules:

FakeKey -	3
---------------------	-------------------

Chapter 2

Module Documentation

2.1 FakeKey -

yada yada yada

Typedefs

- `typedef struct FakeKey FakeKey`
Opaque structure used for all operations.

Enumerations

- `enum FakeKeyModifier`
enumerated types for #mb_pixbuf_img_transform

Functions

- `FakeKey * fakekey_init (Display *xdpy)`
Initiates FakeKey.
- `int fakekey_press (FakeKey *fk, const unsigned char *utf8_char_in, int len_bytes, int modifiers)`
Sends a Keypress to the server for the supplied UTF8 character.
- `void fakekey_repeat (FakeKey *fk)`
Repeats a press of the currently held key (from fakekey_press)
- `void fakekey_release (FakeKey *fk)`
Releases the currently held key (from fakekey_press)
- `int fakekey_reload_keysyms (FakeKey *fk)`
Resyncs the internal list of keysyms with the server.
- `int fakekey_press_keysym (FakeKey *fk, KeySym keysym, int flags)`
fakekey_press but with an X keysym rather than a UTF8 Char.
- `int fakekey_send_keyevent (FakeKey *fk, KeyCode keycode, Bool is_press, int modifiers)`

2.1.1 Detailed Description

yada yada yada

Always remember to release held keys

2.1.2 Function Documentation

2.1.2.1 fakekey_init()

```
FakeKey* fakekey_init (
    Display * xdpay )
```

Initiates FakeKey.

Parameters

<code>xdpy</code>	X Display connection.
-------------------	-----------------------

Returns

new [FakeKey](#) reference on success, NULL on fail.

2.1.2.2 fakekey_press()

```
int fakekey_press (
    FakeKey * fk,
    const unsigned char * utf8_char_in,
    int len_bytes,
    int modifiers )
```

Sends a Keypress to the server for the supplied UTF8 character.

Parameters

<code>fk</code>	FakeKey refernce from <code>fakekey_init</code>
<code>utf8_char_in</code>	Pointer to a single UTF8 Character data.
<code>len_bytes</code>	Lenth in bytes of character, or -1 in ends with 0
<code>modifiers</code>	OR'd list of FakeKeyModifier modifiers keys to press with the key.

Returns

2.1.2.3 fakekey_press_keysym()

```
int fakekey_press_keysym (
    FakeKey * fk,
    KeySym keysym,
    int flags )
```

[fakekey_press](#) but with an X keysym rather than a UTF8 Char.

Parameters

<i>fk</i>	FakeKey refernce from fakekey_init
<i>keysym</i>	X Keysym to send
<i>flags</i>	

Returns

2.1.2.4 fakekey_release()

```
void fakekey_release (
    FakeKey * fk )
```

Releases the currently held key (from [fakekey_press](#))

Parameters

<i>fk</i>	FakeKey refernce from fakekey_init
-----------	--

2.1.2.5 fakekey_reload_keysyms()

```
int fakekey_reload_keysyms (
    FakeKey * fk )
```

Resyncs the internal list of keysyms with the server.

Should be called if a MappingNotify event is received.

Parameters

<i>fk</i>	FakeKey refernce from fakekey_init
-----------	--

Returns**2.1.2.6 fakekey_repeat()**

```
void fakekey_repeat (
    FakeKey * fk )
```

Repreats a press of the currently held key (from [fakekey_press](#))

Parameters

<i>fk</i>	FakeKey refernce from fakekey_init
-----------	--

2.1.2.7 fakekey_send_keyevent()

```
int fakekey_send_keyevent (
    FakeKey * fk,
    KeyCode keycode,
    Bool is_press,
    int modifiers )
```

Parameters

<i>fk</i>	FakeKey refernce from fakekey_init
<i>keycode</i>	X Keycode to send
<i>is_press</i>	Is this a press (or release)
<i>modifiers</i>	

Returns
